DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

. Application/Control Number: 09/885,721

Art Unit: 1655

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 6-8, 12, 13, 51-54 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 409067245 (abstract).

JP teaches a bathing agent that contains humulus lupulus (hops) which is extracted with water and can also contain vitamins, fats, etc. The agent can be in tablet form.

Claims 1, 6-8, 12, 13, 52-54 are rejected under 35 U.S.C. 102(b or e) as being anticipated by Schwartz et al. (paragraphs 59-64, and the claims) or Eskeland et al. (col. 3, lines 5-25, example 2).

Both references show that hop extracts containing proteins and antioxidants in the form of capsules are known.

Claims 1, 6, 7, 12, 13, 52-54 are rejected under 35 U.S.C. 102(e) as being anticipated by Casado Galcera (col. 2, lines 33-50, and the claims).

Casado teaches a hop extract in a hair lotion which has vitamins in it.

Claims 1, 6, 8, 12, 13, 51-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Owades (col. 2, lines 40-end, example 2).

Owades teaches a hop extract in a spray form which also contains carbohydrates (sorbitol) and the hops have been extracted with hexane.

Claims 1, 6-8, 12, 13, 51, 52, 54 are rejected under 35 U.S.C. 102(b) as being anticipated by Davies (abstract).

Davies shows hops containing carbohydrates, proteins and minerals.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 6-8, 12, 13, 51-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davies, Eskeland et al., Schwartz et al., Casado Galcera, or Owades taken with JP 409067245.

What each of the references teach is above. What they lack is made up in JP. JP teaches all of the claimed elements of the invention. JP teaches a bathing agent with hops (humulus lupulus), hops extracted with a solvent like water, fats in it, vitamins in it, and in tablet form.

Since JP teaches that all of these components are known to be used together in one composition then it would have been obvious to use in other compositions containing hops since they are all used for cosmetic/pharmaceutical purposes.

Page 5

This is a RCE of applicant's earlier Application No. 09/885,721. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Meller whose telephone number is 571-272-0967. The examiner can normally be reached on Monday thru Thursday: 9:30am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terry McKelvey can be reached on 571-272-0775. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
